

Apprenticeships Bradford College

Bradford College are working with Mission 44 with the aim to grow participation of females and ethnic minorities into STEM apprenticeships.

Our target is to offer apprenticeship opportunities to increase confidence and skills in female and ethnic minority students to pursue careers in engineering or motorsport.

Bursaries are available for apprentices and employers!

Could you offer an opportunity?

Mission 44 is focused on building a more inclusive education system, opening doors to careers within STEM, motorsport, and the creative industries, and empowering young people to become an influential force for change.

Mission 44 is a charitable foundation launched by Sir Lewis Hamilton to build a fairer, more inclusive future in which every young person can thrive.

What is STEM?

STEM is an approach to learning and development that combines the subjects of Science, Technology, Engineering and Mathematics. These fields teach essential 21st-century skills to students who will grow up to develop machines, design buildings, discover medicines, and solve the mysteries of the universe in our lifetimes.

Mission 44 was founded by Sir Lewis Hamilton to build a fairer, more inclusive future in which every young person can thrive.

The foundation supports bold organisations, leaders and ideas to reimagine the future and transform the lives of young people from underserved communities through grantmaking, research and advocacy.
